	Urgent	**Not Urgent**
Important	**Do - (Your MVP)** ● Load and parse a sports player stats using Pandas. ● Build a search filter function to look up a single player stats by name. ● Output a clean summary of the players stats to the terminal.	**Schedule - (For V2.0+)** ● Add a side by side comparison between two players. ● Generate ranking charts of many players. ● Packing all info into an interactive UI.
Not Important	**Delegate - (Use a library)** ● Use the Python pandas library. ● Use standard print formatting or standard libraries instead of custom UI. ● Rely on open source datasets.	**Delete - (Cut it)** ● Connect to live, real time sports. ● Build a full application with remote hosting. ● Implement machine learning predictive models for future games.
